

Perfios <> NuralX - Assessment Guidelines

Scan Instructions

For a reliable health scan assessment, please wait 30–60 minutes after exercising, consuming caffeine, or smoking. Ensure that you are well-rested and focused during the scan to achieve accurate results. Position your phone at eye level and hold it close to your face, making sure there is good front lighting to avoid shadows on your face.

Range Description

1. **Resting Heart Rate:**
 - Normal: 60-100 beats per minute (bpm)
 - Abnormal:
 - High: >100 bpm
 - Low: <60 bpm
2. **Breathing Rate:**
 - Normal: 12-20 breaths per minute
 - Abnormal:
 - High: >20 breaths per minute
 - Low: <12 breaths per minute
3. **Oxygen Saturation:**
 - Normal: 95-100%
 - Abnormal:
 - Low: <95%
4. **HRV-SDNN** (Heart Rate Variability Standard Deviation of NN intervals):
 - Normal: >50
 - Low HRV: <50
5. **Stress Index and Level:**

Stress Level	Stress Index Range
Low	0 – 80
Normal	81 – 150
Mild	151 – 300
High	301 – 600
Very High	601 and above

Stress Level: 1-Low, 2-Normal, 3-Mild, 4-High, 5-Very High

6. **Blood Pressure:**
 - Normal: Sys 90-130 mmHg
 - Abnormal:
 - High: ≥ 130 mmHg
 - Low: < 90 mmHg
7. **PNS Zone - Recovery Ability**
1-Low, 2-Normal, 3-High
8. **SNS Zone - Stress Response (Fight or Flight)**
1-Low, 2-Normal, 3-High
9. **Hemoglobin:**
 - Normal: 12-16 g/dL for adult females, 14-18 g/dL for adult males
10. **All Risks and Scores (High Hba1C Risk, High BP Risk, Low Hb, High Fasting Glucose Risk, ASCVD Risk Level)**
1-Low, 2-Medium, 3-High
